FORM 2
MCH BUDGET DETAILS FOR FY 2011

[Secs. 504 (d) and 505(a)(3)(4)]

STATE: IL

1. FEDERAL ALLOCATION

(Item 15a of the Application Face Sheet [SF 424])
Of the Federal Allocation (1 above), the amount earmarked for:

\$ 21,700,000

A.Preventive and primary care for children:

\$ 7,954,801 (36.66%)

B.Children with special health care needs:

\$ 6,510,000 (30%)

(If either A or B is less than 30%, a waiver request must accompany the application)[Sec. 505(a)(3)]

C.Title V administrative costs:

\$ 852,720 (3.93%)

(The above figure cannot be more than 10%)[Sec. 504(d)]

2. UNOBLIGATED BALANCE (Item 15b of SF 424)

\$ 0

3. STATE MCH FUNDS (Item 15c of the SF 424)

\$ 28,696,702

4. LOCAL MCH FUNDS (Item 15d of SF 424)

\$ 0

5. OTHER FUNDS (Item 15e of SF 424)

\$ 251,784,525

6. PROGRAM INCOME (Item 15f of SF 424)

\$ 8,000,000

7. TOTAL STATE MATCH (Lines 3 through 6)

(Below is your State's FY 1989 Maintenance of Effort Amount)

\$ 27,569,600

\$ 288,481,227

8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP (SUBTOTAL)

(Total lines 1 through 6. Same as line 15g of SF 424)

\$ 310,181,227

9. OTHER FEDERAL FUNDS

(Funds under the control of the person responsible for the administration of the Title V program)

a. SPRANS: \$ 0

b. SSDI: \$ 0

c. CISS: \$ 105,000

d. Abstinence Education: \$ 0

e. Healthy Start: \$ 1,484,650

f. EMSC: \$ 0

g. WIC: \$ 352,933,300

h. AIDS: \$ 0

i. CDC: \$ 0

j. Education: \$ 19,579,600

k. Other: \$ 0

Child Care \$ 1,066,000

Family Violence \$ 2,574,500

Other Demonstrations \$ 790,150

Substance Abuse \$ 16,466,293

Title X \$ 6,742,978

Title XX \$ 10,908,090

UNHS \$ 225,000

Youth Services \$ 1,410,553

10. OTHER FEDERAL FUNDS (SUBTOTAL of all Funds under item 9)

\$ 414,286,114

11. STATE MCH BUDGET TOTAL

(Partnership subtotal + Other Federal MCH Funds subtotal)

\$ 724,467,341

FORM NOTES FOR FORM 3

None

FIELD LEVEL NOTES

1. **Section Number:** Form3_Main
Field Name: UnobligatedBalanceExpended
Row Name: Unobligated Balance
Column Name: Expended
Year: 2009
Field Note:
The State of Illinois has expended the entire FFY'09 award.
2. **Section Number:** Form3_Main
Field Name: StateMCHFundsExpended
Row Name: State Funds
Column Name: Expended
Year: 2009
Field Note:
IDHS, IDPH and DSCC provided a total of \$37.3 million in state funds to meet Title V's match and Maintenance of Effort requirements. This amount exceeds both required amounts.
3. **Section Number:** Form3_Main
Field Name: StateMCHFundsExpended
Row Name: State Funds
Column Name: Expended
Year: 2008
Field Note:
See Budget Narrative
4. **Section Number:** Form3_Main
Field Name: LocalMCHFundsExpended
Row Name: Local MCH Funds
Column Name: Expended
Year: 2009
Field Note:
The State of Illinois reports the amount of local funds used to match expenditures of Title V Section 510 (Abstinence Education) funds as "local funds" for the MCH Block Grant.
5. **Section Number:** Form3_Main
Field Name: LocalMCHFundsExpended
Row Name: Local MCH Funds
Column Name: Expended
Year: 2008
Field Note:
See Budget Narrative
6. **Section Number:** Form3_Main
Field Name: OtherFundsExpended
Row Name: Other Funds
Column Name: Expended
Year: 2009
Field Note:
The additional expenditures of Other State Funds (\$39 million more than the amount budgeted) reflect the inclusion of all non-federal Part C Early Intervention program funds in the expenditure report. Prior reports have included only the case management funds.
7. **Section Number:** Form3_Main
Field Name: ProgramIncomeExpended
Row Name: Program Income
Column Name: Expended
Year: 2009
Field Note:
The State of Illinois reports the amount of funds collected by Title X (Family Planning) delegate agencies as program income. Collections were below expectations.
8. **Section Number:** Form3_Main
Field Name: OtherFedFundsExpended
Row Name: Other Federal Funds
Column Name: Expended
Year: 2009
Field Note:
The Department received and expended approximately \$40 million more for the Special Supplemental Nutrition Program for Women, Infants and Children (WIC) in FFY'09 than originally projected, while expenditures of other federal funds were below the budgeted amount, resulting in a net increase in expenditures of \$34 million.

10. **Section Number:** Form4_I. Federal-State MCH Block Grant Partnership
Field Name: AdminExpended
Row Name: Administration
Column Name: Expended
Year: 2009
Field Note:
The IDHS is required by Circular A-87 to have a Public Assistance Cost Allocation Plan (PACAP). The U.S. DHHS Division of Cost Allocation has requested that IDHS have a Departmental Indirect Cost Allocation Plan for indirect costs to identify dollars that then become a part of the PACAP each quarter in claiming federal reimbursement. IDHS does not use indirect rates for its programs. It is considered full costing on a quarterly basis. Amounts budgeted for indirect costs are converted to direct costs through the PACAP. The costs identified as administration reflect audit costs and PACAP costs in excess of actual personal services expenditures.

FORM NOTES FOR FORM 5

None

FIELD LEVEL NOTES

1. **Section Number:** Form5_Main
Field Name: DirectHCBudgeted
Row Name: Direct Health Care Services
Column Name: Budgeted
Year: 2008
Field Note:
The increase in budget is due to increase in cost of youth services programs.
2. **Section Number:** Form5_Main
Field Name: DirectHCExpended
Row Name: Direct Health Care Services
Column Name: Expended
Year: 2009
Field Note:
The additional expenditures for Direct Health Care services reflect the inclusion of all non-federal expenditures for the Part C Early Intervention program and the inclusion of (Family Planning) program income.
3. **Section Number:** Form5_Main
Field Name: EnablingBudgeted
Row Name: Enabling Services
Column Name: Budgeted
Year: 2008
Field Note:
The increase in budget is due to increase in cost of youth services programs.
4. **Section Number:** Form5_Main
Field Name: EnablingExpended
Row Name: Enabling Services
Column Name: Expended
Year: 2009
Field Note:
The amount expended for Enabling services was below the budgeted amount due to a number of changes in the classification of expenses. Expenditures for the Department's information systems (principally Cornerstone), training and program evaluations, Healthy Child Care Illinois and Coordinated School Health were reclassified as expenditures for Infrastructure Building. The Community Youth Services program was reclassified from Enabling to Population Based. Offsetting these reductions, the full amount of Part C expenditures for the Child and Family Connections agencies were reclassified as expenditures for Enabling services.
5. **Section Number:** Form5_Main
Field Name: PopBasedExpended
Row Name: Population-Based Services
Column Name: Expended
Year: 2009
Field Note:
The significant increase in expenditures for Population-Based services resulted from the reclassification of expenditures for the Teen REACH program, the Comprehensive Addition Prevention program, Community Youth Services and Communities For Youth programs as Population-Based.
6. **Section Number:** Form5_Main
Field Name: PopBasedExpended
Row Name: Population-Based Services
Column Name: Expended
Year: 2008
Field Note:
See Budget Narrative
7. **Section Number:** Form5_Main
Field Name: InfrastrBuildExpended
Row Name: Infrastructure Building Services
Column Name: Expended
Year: 2009
Field Note:
Finally, the difference between the amount budgeted and expended for Infrastructure Building reflects the inclusion of expenditures for the Cornerstone management information system and Healthy Child Care Illinois, a change in the allocation of expenditures for the Part C program and the allocation of IDHS' expenditures for operation among all four types of services.
8. **Section Number:** Form5_Main
Field Name: InfrastrBuildExpended
Row Name: Infrastructure Building Services
Column Name: Expended
Year: 2008
Field Note:

FIELD LEVEL NOTES

1. **Section Number:** Form8_I. Unduplicated Count By Race

Field Name: DeliveriesTotal_All

Row Name: Total Deliveries in State

Column Name: Total All Races

Year: 2011

Field Note:

This number is the 2008 occurrent births, provided by IDPH.

2. **Section Number:** Form8_I. Unduplicated Count By Race

Field Name: DeliveriesTitleV_All

Row Name: Title V Served

Column Name: Total All Races

Year: 2011

Field Note:

This number is provided by IDHS Cornerstone reporting. It represents prenatal care services to women enrolled during 2009 in the WIC program, CDOH (referred to as the 'mini block'), and the IDPH Genetics program.

It also includes data received from IDHS for prenatal care services paid for by Title XXI. In preparing the data for Form 7-Total Deliveries as shown in this cell for Form 8, the Medicaid proportion from IDHFS of 88,297 women is not included in the total. This number is duplication of the WIC-Medicaid proportion of 108,110 from Cornerstone reporting. For the first time, the SCHIP-eligible number from IDHFS of 9,606 is included in the total.

The total race/ethnicity distribution among these separate systems named above is unknown; the estimates have been extrapolated to the race/ethnicity distribution of 2008 deliveries provided by IDPH.

3. **Section Number:** Form8_I. Unduplicated Count By Race

Field Name: DeliveriesTitleXIX_All

Row Name: Eligible for Title XIX

Column Name: Total All Races

Year: 2011

Field Note:

IDHFS demographic and paid claims information based on deliveries paid during CY2009. Ethnicity is unknown, proportioned as a race or is Other. Source: Medical Data Warehouse, IDHFS.

4. **Section Number:** Form8_I. Unduplicated Count By Race

Field Name: InfantsTotal_All

Row Name: Total Infants in State

Column Name: Total All Races

Year: 2011

Field Note:

2008 Births, IDPH

5. **Section Number:** Form8_I. Unduplicated Count By Race

Field Name: InfantsTitleV_All

Row Name: Title V Served

Column Name: Total All Races

Year: 2011

Field Note:

2009 Estimate of newborn screening, Genetics, IDPH. The race/ethnicity distribution are extrapolated to the 2008 number of infants, IDPH.

6. **Section Number:** Form8_II. Unduplicated Count by Ethnicity

Field Name: DeliveriesTitleV_NotReported

Row Name: Title V Served

Column Name: Ethnicity Not Reported

Year: 2011

Field Note:

Hispanic or Latino origin is unknown for Title V served. The reporting of race and ethnicity has been extrapolated to the 2008 birth file race/ethnicity distribution.

7. **Section Number:** Form8_II. Unduplicated Count by Ethnicity

Field Name: DeliveriesTitleXIX_EthnicityOther

Row Name: Eligible for Title XIX

Column Name: Other and Unknown

Year: 2011

Field Note:

Hispanic or Latino origin is unknown in both the Medical Data Warehouse and Cornerstone unless the "origin" field is matched with the birth file from IDPH.

8. **Section Number:** Form8_II. Unduplicated Count by Ethnicity

Field Name: InfantsTitleV_NotReported

Row Name: Title V Served

Column Name: Ethnicity Not Reported

Year: 2011

Field Note:

Hispanic or Latino origin is unknown for Title V served. The reporting of race and ethnicity has been extrapolated to the 2008 birth file race/ethnicity distribution.

FORM 10
TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT
STATE PROFILE FOR FY 2011
[SEC. 506(A)(1)]
STATE: IL

1. State MCH Administration:
(max 2500 characters)

The Illinois Department of Human Services (IDHS) administers the Maternal and Child Health Services Block Grant. IDHS uses these funds to provide preventive and primary care services to women, infants, children and adolescents throughout the state. IDHS transfers 30% of the Block Grant funds to the University of Illinois at Chicago Division of Specialized Care for Children (DSCC) to operate the state's program for children with special health care needs. IDHS also transfers some Block Grant funds to the Illinois Department of Public Health (IDPH) to administer population-based services for pregnant women, infants and children, including perinatal care, metabolic and hearing screening of newborns, oral health services, screening for lead poisoning and vision and hearing screening of older children.

Block Grant Funds

2. Federal Allocation (Line 1, Form 2)	\$ 21,700,000
3. Unobligated balance (Line 2, Form 2)	\$ 0
4. State Funds (Line 3, Form 2)	\$ 28,696,702
5. Local MCH Funds (Line 4, Form 2)	\$ 0
6. Other Funds (Line 5, Form 2)	\$ 251,784,525
7. Program Income (Line 6, Form 2)	\$ 8,000,000
8. Total Federal-State Partnership (Line 8, Form 2)	\$ 310,181,227

9. Most significant providers receiving MCH funds:

Local Health Departments
Community Health Centers
Community-based Organizations
Universities and Hospitals

10. Individuals served by the Title V Program (Col. A, Form 7)

a. Pregnant Women	141,679
b. Infants < 1 year old	166,913
c. Children 1 to 22 years old	1,655,240
d. CSHCN	24,242
e. Others	125,901

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:
(max 2500 characters)

Illinois' statewide initiatives and partnerships for direct health care and enabling services include the following: the integration of WIC and Family Case Management which has substantially improved pregnancy outcomes among low-income women; HealthWorks of Illinois, a unique health care system for children in state custody; Teen Pregnancy Prevention which has contributed to the reduction in the teen fertility rates through an array of primary and secondary prevention services; CSHCN Care Coordination Services for children with physical disabilities as well as children who are technology-dependent.

b. Population-Based Services:
(max 2500 characters)

Illinois' statewide initiatives and partnerships for population-based services include the following: the Universal Newborn Hearing Screening program which ensures that every newborn in Illinois is screened for hearing loss and that those suspected of hearing loss receive appropriate diagnostic testing and intervention before six months of age; the Newborn Metabolic Screening program which ensures that every newborn in Illinois is screened for more than 30 metabolic diseases and that infants suspected of having a disorder receive appropriate diagnostic testing and follow-up; and the Perinatal Care program which ensures coordination of perinatal care services among regional hospital networks so that women and infants receive risk-appropriate care.

c. Infrastructure Building Services:
(max 2500 characters)

Illinois' statewide initiatives and partnerships to strengthen the service delivery infrastructure include: collaboration with the Illinois Department of Healthcare and Family Services to promote enrollment in All Kids, to support implementation of Primary Care Case Management and Disease Management and to support implementation of Illinois Healthy Women; Healthy Child Care Illinois, a network of Child Care Nurse Consultants who provide training, consultation and technical assistance to child care providers throughout the state; Collaborative Initiatives for CSHCN, including benefits management technical assistance, participation on the Interagency Coordinating Council on Transition, and publishing the family newsletter Special Addition; other CSHCN education and training, including the Internet-based continuing education program on the "Medical Home: concept, developed with state pediatric and family practice associations; providing quality improvement technical assistance to primary care practices; and developing a training initiative for primary care providers on newborn hearing screening; the All Our Kids Assurance Networks to improve the service system for infants and toddlers.

<u>Annual Objective and Performance Data</u>					
	2010	2011	2012	2013	2014
Annual Performance Objective	42	43	44	45	46
Annual Indicator					
Numerator					
Denominator					

Field Level Notes**1. Section Number:** Form11_Performance Measure #9**Field Name:** PM09**Row Name:****Column Name:****Year:** 2009**Field Note:**

According to the IDPH, Division of Oral Health, the 2008-2009 survey of 3rd grade children showed 41.5 percent of 3rd grade children had sealants on at least one permanent molar tooth. Every year the MCH program has extrapolated this percentage to the statewide population of 3rd grade students located at the Illinois State Board of Education's website.

The very small underresourced public health program completes a statewide third grade Basic Screening Survey every five years based on the Association of State and Territorial Dental Directors and CDC guidance.

In 2009, 18,367 3rd grade children received sealants covered by IDHFS medical programs (Title XIX, Title XXI, and State Funded) - IDHFS Dental Claims Data from the Medical Data Warehouse.

2. Section Number: Form11_Performance Measure #9**Field Name:** PM09**Row Name:****Column Name:****Year:** 2008**Field Note:**

According to the IDPH, Oral Health program, the next oral health state level 3rd grade survey is in progress for 2008-09. The 2004 through 2007 percentage is from its 2003-04 oral health survey results. Every year the MCH program has extrapolated this percentage to the statewide population of 3rd grade students located at the Illinois State Board of Education's website. Since the percentage has not changed, the MCH program is reporting last year's numerator and denominator.

The annual performance objectives for 2008-2012 have been adjusted one percent to correct a 'data alert' stating the state has already surpassed subsequent year's objectives. This has been true since 2005. The very small underresourced public health program completes a statewide third grade Basic Screening Survey every five years based on the Association of State and Territorial Dental Directors and CDC guidance.

3. Section Number: Form11_Performance Measure #9**Field Name:** PM09**Row Name:****Column Name:****Year:** 2007**Field Note:**

According to the IDPH, Oral Health program, the next oral health state level 3rd grade survey is planned for 2008-09. The 2004 through 2007 percentage is from its 2003-04 oral health survey results. Every year the MCH program has extrapolated this percentage to the statewide population of 3rd grade students located at the Illinois State Board of Education's website. Since the percentage has not changed, the MCH program is reporting last year's numerator and denominator.

The annual performance objectives for 2008-2012 have been adjusted one percent to correct a 'data alert' stating the state has already surpassed subsequent year's objectives. This has been true since 2005. It is possible in the future that Illinois will have a more positive method of reporting these data as a state instead of relying on the data collection of a very small underresourced public health program.

PERFORMANCE MEASURE # 10

The rate of deaths to children aged 14 years and younger caused by motor vehicle crashes per 100,000 children.

<u>Annual Objective and Performance Data</u>

	2010	2011	2012	2013	2014
Annual Performance Objective	27	28	28	28	29
Annual Indicator					
Numerator					
Denominator					

Field Level Notes**1. Section Number:** Form11_Performance Measure #11**Field Name:** PM11**Row Name:****Column Name:****Year:** 2009**Field Note:**

The Numerator is infants Still Breastfed at 6 Months. The Denominator is infants Ever Breastfed. Source: Count and Percent of WIC Breastfed Infants, SFY 2009 Annual Report, CHP, IDHS.

2. Section Number: Form11_Performance Measure #11**Field Name:** PM11**Row Name:****Column Name:****Year:** 2008**Field Note:**

The Numerator is infants Still Breastfed at 6 Months. The Denominator is infants Ever Breastfed. Source: Count and Percent of WIC Breastfed Infants, SFY 2008 Annual Report, CHP, IDHS. According to the Breastfeeding Report Card, United States 2008: Outcome Indicators (which reports WIC and Other data) the Illinois' percent at 'breastfed at 6 months' was 37.5.

The downward trend is due to stricter edits or quality assurances measures added to the client information system. Previously, WIC service providers reported breast feeding at the first assessment (newborn) and did not update that information upon subsequent visits. The information system now requires an update with every certification/assessment visit. The reported information more accurately reflects breast feeding behavior at six months than in previous years.

3. Section Number: Form11_Performance Measure #11**Field Name:** PM11**Row Name:****Column Name:****Year:** 2007**Field Note:**

The Numerator is infants Still Breastfed at 6 Months. The Denominator is infants Ever Breastfed. Source: Count and Percent of WIC Breastfed Infants, SFY 2007 Annual Report, CHP, IDHS. According to the Breastfeeding Report Card, United States 2007: Outcome Indicators (which reports WIC and Other data) the Illinois' percent at 'breastfed at 6 months' was 40.9.

The downward trend is due to stricter edits or quality assurances measures added to the client information system. Previously, WIC service providers reported breast feeding at the first assessment (newborn) and did not update that information upon subsequent visits. The information system now requires an update with every certification/assessment visit. The reported information more accurately reflects breast feeding behavior at six months than in previous years.

Field Level Notes**1. Section Number:** Form11_State Performance Measure #3**Field Name:** SM3**Row Name:****Column Name:****Year:** 2009**Field Note:**

Source: Total number served by clinical genetic, pediatric hematologist, and local health department grantees (data collection provided by quarterly reports for 2008), Genetics Program. Data updated 6/30/10.

The 2000 Census estimate was provided by the Genetics Program in 2001 only and have been applied for the trend to the last year (2009).

2. Section Number: Form11_State Performance Measure #3**Field Name:** SM3**Row Name:****Column Name:****Year:** 2008**Field Note:**

Source: Total number served by clinical genetic, pediatric hematologist, and local health department grantees (data collection provided by quarterly reports for 2008), Genetics Program. Data updated 6/30/10.

The 2000 Census estimate was provided by the Genetics Program in 2001 only and have been applied for the trend to the last year (2008).

3. Section Number: Form11_State Performance Measure #3**Field Name:** SM3**Row Name:****Column Name:****Year:** 2007**Field Note:**

Source: Total number served by clinical genetic, pediatric hematologist, and local health department grantees (data collection provided by quarterly reports for 2007), Genetics Program. The 2000 Census estimate provided by the Genetics Program was not reported until 2001 and will be continually used for this measure.

A change in data collection procedures resulted in a reduction in this performance measure. A data audit determined that in the past, service providers reported the number of individuals screened rather than the number referred for a genetic condition or concern. Guidelines were refined in an effort to capture the number of clients actually referred rather than merely screened. The performance target was lowered to 1.0 percent to reflect this change in practice. And, although, the performance target was met, the goal was not.

STATE PERFORMANCE MEASURE # 4 - REPORTING YEAR

The prevalence of Early Childhood Caries (ECC)

<u>Annual Objective and Performance Data</u>					
	2005	2006	2007	2008	2009

FORM 14
LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: IL FY: 2011

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Improve Title V's capacity to collect, acquire, integrate/link, analyze, and utilize administrative, programmatic, and surveillance data.
2. Integrate medical and community-based services for MCH populations and improve linkage of clients to these services, particularly CSHCN.
3. Promote, build, and sustain healthy families and communities.
4. Expand availability, access to, quality, and utilization of medical homes for all children and adolescents, including CSHCN.
5. Expand availability, access to, quality, and utilization of medical homes for all women.
6. Promote healthy pregnancies and reduce adverse pregnancy outcomes for mothers and infants.
7. Address the oral health needs of the MCH population through prevention, screening, referral, and appropriate treatment.
8. Address the mental health needs of the MCH population through prevention, screening, referral, and appropriate treatment.
9. Promote healthy weight, physical activity, and optimal nutrition for women and children.
10. Promote successful transition of youth with special health care needs to adult life.

FORM 16
STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: IL

SP(Reporting Year) # 1

PERFORMANCE MEASURE:

The incidence of maltreatment of children younger than age 18

STATUS:

Active

GOAL

To reduce the number of children under 18 years of age who are victims of child abuse and neglect.

DEFINITION

"Indicated" means credible evidence was gathered which would cause a reasonable person to believe a child was abused or neglected.

Numerator:

The number of indicated child victims under 18 years of age.

Denominator:

The number of children under 18 years of age.

Units: 1000 **Text:** 2

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Annual Report published by the Illinois Department of Children and Family Services. The denominator is obtained from the 2000 U.S. Census.

SIGNIFICANCE

Child abuse threatens the health of many children. Violent and abusive behaviors have been increasingly recognized as an important public health problem. Illinois' current child abuse rate is well below the Healthy People 2000 objective level. This is a critical measure for the State that will continue to receive attention.

SP(Reporting Year) # 2

PERFORMANCE MEASURE:

The proportion of CSHCN ages 14 and above and their parents who receive comprehensive transition planning services to promote awareness of adult services

STATUS:

Active

GOAL

Provide comprehensive transition planning for CSHCN ages 14 and above and their parents

DEFINITION

Staff will develop and test comprehensive transition planning materials. Upon training of staff, comprehensive transition planning will be implemented statewide for CSHCN for ages 14 and above who are interested in this training.

Numerator:

Number of CSHCN ages 14 and above and parents who receive comprehensive transition planning with local care coordinators for the reporting year

Denominator:

Number of CSHCN ages 14-21 served throughout the state

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Children's Health Management Information System, Special Report

SIGNIFICANCE

Based on the 1990 Transition Survey of DSCC clients and 1996 Client Survey, approximately 50% of those CSHCN and their families surveyed expressed a need for assistance in transition planning to adult services. DSCC staff believe that increased knowledge about specific transition services would enable them to better assist CSHCN plan for adult life. Students eligible for services under Part B of IDEA receive transition services. Not all CSHCN are eligible for Part B services but would benefit from transition planning to prepare for adult services, particularly health care. Families want to know how to obtain and pay for medical care when a child transitions to adult services as well as options for independent living, recreation and socialization. A comprehensive, coordinated effort is needed to assist families of CSHCN be better prepared for adult life.

PERFORMANCE MEASURE:

The proportion of women and children up to 22 years of age who receive appropriate genetic testing, counseling, education and follow-up services

STATUS:

Active

GOAL

By 2000, increase the proportion of women and children up to 22 years of age who receive appropriate genetic testing, counseling, education and follow-up services to 5% of the population of women of childbearing age and children in the state.

DEFINITION

Clinical genetic centers will be given grants to provide genetic testing, diagnosis, counseling, treatment and long range management to families who have a genetic concern. Local health departments will be given grants to offer accessible services for the target population and to provide tracking, education, referral, and follow-up services to families in need. Pediatric hematologists will be given grants to provide diagnostic testing, genetic counseling and medical care to infants and children with a sickling hemoglobinopathy or trait.

Numerator:

The number of women of child-bearing age and children up to age 22 who received appropriate genetic testing, counseling, education and follow-up services.

Denominator:

The total number of women of child-bearing age (13-44) and the total number of children up to age 22 years in the state.

Units: 100 **Text:** 1

HEALTHY PEOPLE 2010 OBJECTIVE**DATA SOURCES AND DATA ISSUES**

Genetic Grant Quarterly Reports and 2000 Census Data

SIGNIFICANCE

New discoveries are rapidly changing traditional medicine. Clinical genetics is becoming one of the most important preventive treatment modalities of the future. Preconception/prenatal genetic counseling, prenatal testing, newborn screening, and early diagnosis can help prevent premature death, excessive morbidity, mental retardation, and other developmental disabilities; and at the same time, increase the quality of life of those with a genetic disorder. An estimated 50-60% of first trimester miscarriages and 7% of stillbirths and neonatal deaths are due to a chromosome abnormality. Annually, more than 5,000 infants are born with a major birth defect and over 30% of pediatric hospitalizations are due to a genetic disease. As genetic components of more disorders are identified through work completed on the Human Genome Project, these rates will continue to increase.

SP(Reporting Year) # 4

PERFORMANCE MEASURE:

The prevalence of Early Childhood Caries (ECC)

STATUS:

Active

GOAL

To reduce prevalence of Early Childhood Caries

DEFINITION

The proportion children in Head Start with dental caries

Numerator:

Proportion of children in Head Start with dental caries

Denominator:

Children in Head Start

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

21-1, Early Childhood Caries

Reduce the proportion of young children with dental caries experience in their primary teeth.

DATA SOURCES AND DATA ISSUES

Performance had been estimated from a survey of children participating in the WIC program in past years. In 2008 the source has been changed to proportion of Head Start children. IDPH provides the percentage only to the MCH program. Reporting the Annual Indicator only is acceptable in TVIS.

SIGNIFICANCE

ECC/BBTD is a severe form of dental caries that can lead to the destruction of primary teeth. It is frequently caused by prolonged use of nursing bottles containing anything but water. Continual use of a sweetened pacifier and/or breast-feeding at will throughout the night can also cause ECC/BBTD. This form of disease is preventable with appropriate educational interventions. Prevalence in Illinois ranges from 11% to 15% with close to 73% of all children surveyed needing immediate dental care.

SP(Reporting Year) # 5

PERFORMANCE MEASURE:

The prevalence of childhood lead poisoning

STATUS:

Active

GOAL

To reduce the prevalence of childhood lead poisoning.

DEFINITION

The definition of lead poisoning is a confirmed blood lead level of 10 mcg/dL and above. The prevalence rate is determined by dividing the number of children with blood lead levels of 10 mcg/dL and above by the total number of children tested for lead poisoning during a time period.

Numerator:

The number of children with blood lead levels \geq 10 mcg/dL.

Denominator:

The total number of children tested during a time period.

Units: 100 **Text:** 1

HEALTHY PEOPLE 2010 OBJECTIVE

Environmental Health 5-13, 11.

Reduce the prevalence of blood lead levels exceeding 10 μ g/dL to 0 in children aged 1-5.

DATA SOURCES AND DATA ISSUES

Data used comes from the IL Lead Poisoning Program data base. Approximately half of the data is transferred from the State Lab where specimens are analyzed. The remainder comes from private labs who are mandated reporters, however there is no enforcement mechanism. Therefore, collection of data from private labs may be incomplete.

SIGNIFICANCE

Young children and the developing fetus, particularly, are at risk for lead poisoning. It damages the body internally and negatively affects the formation of red blood cells. Very high levels of lead can cause seizures, coma and death. If a child has been exposed to high levels of lead, he or she may suffer severe mental retardation. Even at lower levels of exposure, a child can suffer from developmental delay, lower IQ, hyperactivity, learning disabilities, behavioral problems, impaired hearing and stunted growth. Compounding the problem of lead poisoning is the fact that children who have elevated blood lead levels early in their lives may have no symptoms, which means that parents can be unaware of the condition.

PERFORMANCE MEASURE:

The rate of unintended pregnancy

STATUS:

Active

GOAL

To decrease the number of mistimed or unwanted pregnancies

DEFINITION

The final measure is the proportion of unintended live births from the Pregnancy Risk Assessment Monitoring Systems (PRAMS) survey of Illinois. 2002 Baseline: 42.9 percent

Numerator:

The number of women who indicated that their recent pregnancy was mistimed or unwanted, estimated from the PRAMS survey.

Denominator:

The number of women who gave birth, estimated from the PRAMS survey.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

Reproductive Health: 1.3f. Unintended Pregnancy (females aged 15 - 44 years)

HP2010 Goal: 30.0 percent. The national HP2010 goal is based on the National Survey of Family Growth (NSFG)

DATA SOURCES AND DATA ISSUES

Illinois PRAMS Survey

SIGNIFICANCE

Using PRAMS data, Illinois's unintended pregnancy rate at birth is among the highest in the nation. At least one half of all infants born are unintended. Many of these births result in adverse health outcomes which include prenatal mothers who are less likely to seek prenatal care, less likely to breastfeed, more likely to smoke or use alcohol, more likely to have a low birth weight infant and are at risk for abuse. Approximately 50% of unintended pregnancies are terminated by abortion. As a response, the WIC, FCM, School-based Health Clinics and the Family Planning programs provide screening, counseling and education to this population. Specifically, the Family Planning program is using the demographic profile of high-risk clients who are most likely to experience a pregnancy while taking contra captives to better target effective methods, address side effects, and stress consistency of use. Dissemination of information to public health partners who are addressing unintended pregnancy in the state is underway.

PERFORMANCE MEASURE:

The proportion of children under 36 months of age in WIC or FCM who have received at least one developmental screening test in the previous 12 months

STATUS:

Active

GOAL

To increase the proportion of young low-income children receiving complete services during their well child visits.

DEFINITION

The WIC or FCM measure of children receiving one developmental screening is at 12, 24 and 36 months of age. Measuring the proportion of children less than 36 months includes the total of children ages 12 to 36 months of age in WIC or FCM who have received a developmental screening test within the previous 12 months. The annual range is from April to April. 2004 IL Baseline: 60.0 percent

Numerator:

The number of children aged 12 to 36 months of age in WIC or FCM who have had one developmental screening test within the previous 12 months

Denominator:

The number of children aged 12 to 36 months of age in WIC or FCM

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

None

There are no objectives or related objectives defined in HP2010. 2010 Illinois IDHS Goal: 80.0 percent

Further, there are no measures, targets or goals relating to the proportion of low-income children receiving one developmental screening that can be found in policies or procedures of EPSDT, the American Academy of Pediatrics, the Community Mental Health Services Block Grant program or found in those federal programs that mandate screening and mental health services (Head Start, Early Head Start, Title 1 and the Child Care and Development Block Grant program).

DATA SOURCES AND DATA ISSUES

WIC and FCM participant state data

SIGNIFICANCE

Three federal programs (Medicaid, SCHIP and MCH) providing health insurance also provide opportunities for identification of low-income children with developmental problems or conditions. Progress toward this goal will also show an increased proportion of these children referred to the Early Intervention Program among the general population of children less than 3 years of age.

PERFORMANCE MEASURE:

Females 15 to 24 years of age receiving services at Title X family planning clinics tested at least once for chlamydia

STATUS:

Active

GOAL

To reach and treat a greater proportion of the population at risk for chlamydia infections

DEFINITION

In that young females served in family planning clinics represent the largest proportion of the STD testing/treatment program, this group represents the target population.

Numerator:

The number of females aged 15 to 24 who have been tested once for chlamydia at family planning clinics.

Denominator:

The number of females aged 15 to 24 who are being served at family planning clinics.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

25-1a. Females aged 15 to 24 years attending family planning clinics

The measure is not directly related to the HP2010 Objectives. It was developed to measure the performance of local family planning clinics in the State.

DATA SOURCES AND DATA ISSUES

STD Section, IDPH, FPAR The STD Section measures the percent of positive tests for both chlamydia and gonorrhea at more than a dozen different types of clinics and centers.

SIGNIFICANCE

To identify the number of women aged 15 to 24 infected with chlamydia and provide treatment to help in the reduction of incidence.

FORM 17
HEALTH SYSTEMS CAPACITY INDICATORS
FORMS FOR HSCI 01 THROUGH 04, 07 & 08 - MULTI-YEAR DATA
STATE: IL

Form Level Notes for Form 17

None

HEALTH SYSTEMS CAPACITY MEASURE # 01

The rate of children hospitalized for asthma (ICD-9 Codes: 493.0 -493.9) per 10,000 children less than five years of age.

	Annual Indicator Data				
	2005	2006	2007	2008	2009
Annual Indicator	66.1	66.3	59.7	60.7	61.6
Numerator	5,886	6,024	5,325	5,429	5,505
Denominator	890,545	909,278	891,315	894,368	893,952

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

(Explain data in a year note. See Guidance, Appendix IX.)

HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: IL

HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)
(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Information)

DATABASES OR SURVEYS	Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *	Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)
ANNUAL DATA LINKAGES		
Annual linkage of infant birth and infant death certificates	2	Yes
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	3	No
Annual linkage of birth certificates and WIC eligibility files	3	Yes
Annual linkage of birth certificates and newborn screening files	1	No
REGISTRIES AND SURVEYS		
Hospital discharge survey for at least 90% of in-State discharges	3	No
Annual birth defects surveillance system	3	Yes
Survey of recent mothers at least every two years (like PRAMS)	3	Yes

*Where:
1 = No, the MCH agency does not have this ability.
2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.
3 = Yes, the MCH agency always has this ability.

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: IL

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	2	No
Other: Youth Tobacco Survey	3	No
Illinois Youth Survey	3	Yes

*Where:
1 = No
2 = Yes, the State participates but the sample size is not large enough for valid statewide estimates for this age group.
3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

Notes:
1. HEALTH SYSTEMS CAPACITY INDICATOR #09B was formerly reported as Developmental Health Status Indicator #05.

FORM NOTES FOR FORM 19

None

FIELD LEVEL NOTES

None

FORM 20
HEALTH STATUS INDICATORS #01-#05
MULTI-YEAR DATA
STATE: IL

Form Level Notes for Form 20

None

HEALTH STATUS INDICATOR MEASURE # 01A

The percent of live births weighing less than 2,500 grams.

	<u>Annual Indicator Data</u>				
	2005	2006	2007	2008	2009
Annual Indicator	8.6	8.6	8.5	8.4	8.4
Numerator	15,296	15,607	15,370	14,836	
Denominator	178,872	180,503	180,530	176,634	

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer
 than 5 and therefore a 3-year moving average cannot be
 applied.

(Explain data in a year note. See Guidance, Appendix IX.)

HEALTH STATUS INDICATOR MEASURE # 01B

The percent of live singleton births weighing less than 2,500 grams.

		Annual Indicator Data			
	2005	2006	2007	2008	2009
Annual Indicator	<u>6.6</u>	<u>6.7</u>	<u>6.5</u>	<u>6.4</u>	<u>6.4</u>
Numerator	<u>11,360</u>	<u>11,619</u>	<u>11,345</u>	<u>10,944</u>	<u></u>
Denominator	<u>172,105</u>	<u>173,860</u>	<u>173,787</u>	<u>169,898</u>	<u></u>
Check this box if you cannot report the numerator because 1. There are fewer than 5 events over the last year, and 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.					
(Explain data in a year note. See Guidance, Appendix IX.)					
Is the Data Provisional or Final?				Final	Provisional

Field Level Notes**1. Section Number:** Form20_Health Status Indicator #01B**Field Name:** HSI01B**Row Name:****Column Name:****Year:** 2009**Field Note:**

Data are not available from IDPH for 2009 births. IDHS has no control over the processing or release of the State of Illinois Birth File. Therefore the rate for 2009 uses the rate from 2008 as an estimate. The approximate due date of the 2009 Birth File is May 2011.

11. Section Number: Form21_Indicator 09A

Field Name: HSIRace_DropOutPercent

Row Name: Percentage of high school drop-outs (grade 9 through 12)

Column Name:

Year: 2011

Field Note:

Source: ISBE End of Year reports, Dropouts versus Total Enrolled in grades 9 through 12 for 2009 - 2009 school year.

12. Section Number: Form21_Indicator 10

Field Name: Metropolitan

Row Name: Living in metropolitan areas

Column Name:

Year: 2011

Field Note:

Source: US Department of Agriculture, 2003 Rural-Urban Continuum Codes; source: U.S. Census Bureau, 2009 Illinois Population Estimates (cc-est2009-alldata-17.csv).

The codes include 'urban' as part of the metropolitan counties. For the purposes of entry to this form they are combined.

13. Section Number: Form21_Indicator 11

Field Name: S11_total

Row Name: Total Population

Column Name:

Year: 2011

Field Note:

Source 1: The 2008 American Community Survey (C17024). The total for all ages is 12,568,150. The ACS is the only survey that supplies ratio levels of poverty with a population estimate close to the methods to fulfill requirements of TVIS Form 21, Indicator 11. Utilizing the total estimate above, poverty estimates for poverty below 50% is 5.4; at 100% is 12.2%; at 200% is 30%. These estimates are close to poverty by population estimates shown as final on Form 21, Indicator 11.

Source 2: The 2008 Current Population Survey (POV46). The total for all ages is 12,687,000. The CPS supplies the percent of poverty at 100%. Utilizing the total estimate above, poverty estimates for poverty below 50% cannot be calculated; at 100% is 12.3%; at 200% is 29%. These estimates are close to poverty by population estimates shown as final on Form 21, Indicator 11.

Source 3: The 2008 Population Estimate for Total are specific age breakouts 18-64 and 65+. Children have their own estimates and are not included in the total. See Indicator 12.

The ACS and the CPS counts are individuals and not families for age-specific analysis.

For the purposes of this form in creating levels of poverty for the select MCH population, the official 2008 Population Estimate from the Census Bureau are incorporated along with the C17024 ACS ratios of poverty below 50, 100, and at 200.

The ACS calculation for the 3 breakouts require the addition of the population numbers at the ratio levels of under 0.50, plus 0.50 to 0.99, plus 1.00 to 1.24, plus 1.25 to 1.99. The percent calculations have been extrapolated to the 2008 population estimate for the total population (18-64 and 65+).

14. Section Number: Form21_Indicator 12

Field Name: S12_Children

Row Name: Children 0 through 19 years old

Column Name:

Year: 2011

Field Note:

Source 1: The 2008 American Community Survey (C17024). The total of individuals whom poverty is determined are for ages 0-17 (not children 0-19). The ACS is the only survey that supplies ratio levels of poverty with a population estimate close to the methods to fulfill requirements of TVIS Form 21, Indicator 12. Utilizing the total estimate above, poverty estimates for poverty below 50% is 7.5; at 100% is 17.0%; at 200% is 43.9%. These estimates are close to poverty by children aged 0-19 shown as final on Form 21, Indicator 12.

Source 2: The 2008 Current Population Survey (POV46). The total for children aged 0-17 is estimated at 3,180,000. The CPS supplies the percent of poverty at 100%. Utilizing the total estimate above, poverty estimates for poverty below 50% cannot be calculated; at 100% is 19.3%; at 200% is 38.6%. These estimates are close to poverty by population estimates shown as final on Form 21, Indicator 12.

Source 3: The 2008 Population Estimate for Total are specific age breakouts for children 0-19. Children have their own estimates and are not included in the total. See Indicator 12.

The ACS and the CPS counts are individuals and not families for age-specific analysis.

For the purposes of this form in creating levels of poverty for the select MCH population, the official 2008 Population Estimate from the Census Bureau are incorporated along with the C17024 ACS ratios of poverty below 50, 100, and at 200.

The ACS calculation for the 3 breakouts require the addition of the population numbers at the ratio levels of under 0.50, plus 0.50 to 0.99, plus 1.00 to 1.24, plus 1.25 to 1.99. The percent calculations have been extrapolated to the 2008 population estimate for children aged 0-19.

15. Section Number: Form21_Indicator 09A

Field Name: HSIRace_FosterCare

Row Name: Number living in foster home care

Column Name:

Year: 2011

Field Note:

Source: Foster home data provided by DCFS - letter dated 7/9/10. "Hispanic" is listed as Race so "Hispanic" count was added to "White" count to make total same as DCFS total.

FORM 12
TRACKING HEALTH OUTCOME MEASURES
[SECS 505 (A)(2)(B)(iii) AND 506 (A)(2)(A)(iii)]
STATE: IL

Form Level Notes for Form 12

None

FORM 16
STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: IL

SP(New for Needs Assessment cycle 2011-2015) # 1

PERFORMANCE MEASURE:	Strengthen the State's Title V data capacity
STATUS:	Active
GOAL	To strengthen the capacity of the Illinois Title V program to collect, acquire, integrate/link, analyze, and utilize administrative, programmatic, and surveillance data.
DEFINITION	<p>The extent to which Title V accesses, integrates, analyzes, and disseminates data from twelve state databases. This measure is scored on a scale from 0-48 using a checklist system. Twelve databases of importance for maternal and child health programs were selected as sentinel systems to demonstrate Title V data capacity. Each of the twelve systems can receive up to four points for the completion of specific activities relating to data availability, integration, analysis, and dissemination. The overall data systems score is the sum of the individual scores.</p> <p>Numerator: Not applicable</p> <p>Denominator: Not applicable</p> <p>Units: 48 Text: Scale</p>
HEALTHY PEOPLE 2010 OBJECTIVE	Not available.
DATA SOURCES AND DATA ISSUES	<p>Not available.</p> <p>The completion of this matrix will be based on an annual inventory of data availability, linkage, analysis, and dissemination among Title V staff.</p>
SIGNIFICANCE	<p>This performance measure is linked to state priority #1: Improve Title V's capacity to collect, acquire, integrate/link, analyze, and utilize administrative, programmatic, and surveillance data. To develop evidence-based programs and policies, it is necessary to upgrade the MCH data infrastructure in Illinois. Data systems, collaboration, integration, and epidemiologic capacity were repeatedly cited as major needs throughout the Title V needs assessment. There are distinct levels of data capacity that need to be addressed simultaneously in Illinois: data availability, integration, analysis, and dissemination. All four of these components need to be present and occurring in conjunction with each other for meaningful evidence-based practice, program planning and evaluation.</p>

PERFORMANCE MEASURE:	Integrate MCH services and improve linkage of clients to these services
STATUS:	Active
GOAL	Improve linkage of medical and non-medical services for women, children, and families by promoting and enabling integration of providers.
DEFINITION	<p>Extent to which Title V has completed specific activities related to promotion and enabling of MCH service integration. This measure is scored on a scale from 0-15. Five activities were identified as mechanisms for promoting and enabling MCH service integration. Each activity will receive a score from 0 to 3 based on annual progress: 0 = not started, 1= partially accomplished, 2= mostly accomplished, 3= completely accomplished. The overall score is the sum of the scores for each activity.</p> <p>Numerator: Not applicable.</p> <p>Denominator: Not applicable.</p> <p>Units: 15 Text: Scale</p>
HEALTHY PEOPLE 2010 OBJECTIVE	Not available.
DATA SOURCES AND DATA ISSUES	Activities: A) Explore availability and completeness of existing resource databases and identify gaps. B) Improve existing resource databases by coordinating with host organizations to make the information more complete, accurate, and useful for MCH providers and consumers. If necessary, develop supplemental documents or databases to complement the information available through existing sources. C) Promote use of resource databases by providers and consumers (e.g. develop and/or distribute promotional materials). D) Hold a statewide summit of providers and program administrators for the purpose of linking services and integrating isolated programs. E) Design and implement a web-based queriable database of resources.
SIGNIFICANCE	This performance measure is linked to state priority #2: Integrate medical and community-based services for MCH populations and improve linkage of clients to these services, particularly CSHCN. Providers and consumers in Illinois have expressed frustration with the inefficiencies caused by MCH agencies and programs working in isolation. Lack of communication between agencies results in increased spending, duplicative services, gaps in service delivery, and undue burden on consumers. Providers have requested that Title V promote and enable integration across MCH programs and services through networking opportunities and better outreach and education to providers. Likewise, consumers have requested more information about MCH programs and eligibility requirements. As a result, Title V has identified several action steps to promote and enable service integration.

PERFORMANCE MEASURE:	Identify a Title V comprehensive health promotion measure
STATUS:	Active
GOAL	Identify a performance measure to represent the collective efforts of the Illinois Title V program toward promotion of healthy families and communities.
DEFINITION	<p>To be determined (TBD)</p> <p>Numerator: TBD</p> <p>Denominator: TBD</p> <p>Units: 100 Text: Percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	Not available.
DATA SOURCES AND DATA ISSUES	Selection of a measure and further details are to be completed by March 2011. Since a unit of measure has not been determined, a percentage is being selected until further notice.
SIGNIFICANCE	<p>This performance measure is linked to state priority #3: Promote, build, and sustain healthy families and communities. The concept of "healthy families and communities" can relate to a wide spectrum of health issues, including: male involvement, child abuse, domestic violence, school health, neighborhood safety, built environment, etc. Because of this wide spectrum of work, identifying a measure as an indicator of Title V performance will ensure that programs are being held accountable for a united goal. The selection of this measure, however, needs to be well informed, and not selected hastily. The Illinois Title V program has developed a plan for developing a healthy family/community index. The steps for achieving this are outlined below and will be completed by March 2011. 1) Conduct a literature review to identify potential measures of healthy families and communities, including review of existing indices on healthy families or communities. 2) Construct a state resource list that identifies programs and activities already in place in Illinois pertaining to healthy families and communities. 3) Crosswalk potential measures with the Illinois resource list to identify the potential measures for which Title V has a direct or primary influence. 4) Select a measure, or create a composite measure, for which Title V has a direct or primary influence, including identifying a data collection method.</p>

PERFORMANCE MEASURE:	Increase well-child visits
STATUS:	Active
GOAL	To expand availability, access to, quality, and utilization of medical homes for all children and adolescents, including CSHCN.
DEFINITION	<p>Percentage of Medicaid children ages 3-6 receiving at least one well-child visit in the last year.</p> <p>Numerator: Number of children (3-6) receiving one well-child visit in calendar year</p> <p>Denominator: Number of children (3-6) on Medicaid during calendar year</p> <p>Units: 100 Text: Percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	Not available.
DATA SOURCES AND DATA ISSUES	This data will come from the Illinois Department of Healthcare and Family Services (Medicaid) IDPAEIS101 report. This measure is a Healthcare Effectiveness Data & Information Set (HEDIS) measure.
SIGNIFICANCE	This performance measure is linked to state priority #4. The national performance measure relating to medical home is specific to children with special healthcare needs (CSHCN). We considered using the National Survey of Children's Health to measure the proportion of all children with a medical home in Illinois, but decided against this measure because the data is not updated on an annual or bi-annual basis. Nearly all children in Medicaid are enrolled in the Primary Care Case Management (PCCM) program through Illinois Health Connect, a contractor for the Illinois Department of Healthcare and Family Services. Therefore, instead of measuring overall medical home, we elected to measure an aspect of quality of medical home: adequacy of well-child visits. Children in a medical home should have higher adequacy of well child visits and this measure will monitor progress in achieving enhanced primary care for children in Medicaid.

PERFORMANCE MEASURE:	Increase the proportion of women who have a primary medical care provider
STATUS:	Active
GOAL	To increase the percent of women of childbearing age who have a primary medical care provider.
DEFINITION	<p>Percent of non-pregnant women ages 18-44 years old who have a primary medical care provider.</p> <p>Numerator: Weighted number of non-pregnant female respondents, ages 18-44, indicating they have a personal doctor or nurse</p> <p>Denominator: Weighted number of non-pregnant female respondents aged 18-44</p> <p>Units: 100 Text: Percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	1-5: Increase the proportion of persons with a usual primary care provider to at least 85%. AHS HP2020-3: continues HP2010 Objective 1-5
DATA SOURCES AND DATA ISSUES	Behavioral Risk Factor Surveillance System (BRFSS) on an annual basis. BRFSS is a complex sample survey about the health attitudes and behaviors of adult Illinois residents. It annually surveys approximately 5,000 adults, about 900-1,000 of whom are women ages 18-44 years. As better indicators and measures of women's medical home are developed in the future, the data source or definition for this performance measure may change.
SIGNIFICANCE	<p>This performance measure is linked to state priority #5: Expand availability, access to, quality, and utilization of medical homes for all women. The medical home concept was first developed in the field of pediatrics in 1967 as a mechanism for providing quality medical care that is continuous, comprehensive, family-centered, coordinated, and culturally-sensitive. We believe that the application of a similar model to medical care for women across the lifespan is an important way to promote health throughout the stages of life: preconceptionally, perinatally, interconceptionally, and in the post-childbearing years. The American College of Obstetricians and Gynecologists issued a policy statement on women's medical home in February 2009 based on seven principles: personal physician, physician-directed medical practice, whole person orientation, coordinated care, quality and safety, enhanced access, and payment reform. Because this is an emerging concept, there is not yet a national consensus on how to measure medical home for women (unlike the standard definition used for children's medical home). Due to this, we elected to monitor the proportion of women reporting having a primary medical care provider – this is one of the seven specified components of medical home for women. The BRFSS questionnaire asks about whether the respondent has a personal doctor or nurse and this will be used as the data source now.</p>

PERFORMANCE MEASURE:

Reduce the percentage of unintended pregnancies

STATUS:

Active

GOAL

Reduce the percentage of unintended pregnancies in Illinois

DEFINITION

Percent of new mothers whose birth was the result of an unintended pregnancy. The percent of women with a live birth who report their pregnancy was unintended is based on the following question, "Thinking back to just before you got pregnant with your new baby, how did you feel about becoming pregnant? 1) I wanted to be pregnant sooner; 2) I wanted to be pregnant later; 3) I wanted to be pregnant then; 4) I didn't want to be pregnant then or at any time in the future." Women responding yes to #2 (mistimed) or #4 (unwanted) are considered to have unintended pregnancies.

Numerator:

Number of new moms reporting their recent pregnancy was unintended

Denominator:

Weighted number of new moms responding to survey

Units: 100 **Text:** Percent**HEALTHY PEOPLE 2010 OBJECTIVE**

9-1: Increase percent of pregnancies that are intended to at least 70%

This objective is based on National Survey of Family Growth, which includes all pregnancies, not just those resulting in a live birth.

FP HP2020-1: continues HP2010 Objective 9-1

Healthy People 2020 Objective (Proposed)

DATA SOURCES AND DATA ISSUES

The Illinois Pregnancy Risk Assessment Monitoring System (PRAMS) collects data on an annual basis. PRAMS is a complex sample survey about maternal attitudes and behaviors before, during, and after pregnancy. It annually surveys ~1800 women roughly 3-6 months after delivery of a live infant. PRAMS is representative only of live births, not of all pregnancies or all women.

SIGNIFICANCE

This performance measure is linked to state priority #6: Promote healthy pregnancies and reduce adverse pregnancy outcomes for mothers and infants. Unintended pregnancy is associated with many negative health behaviors and birth outcomes, including lower usage of prenatal care, reduced breastfeeding, increased use of tobacco and alcohol, increased risk of abuse and maltreatment, and increased rates of low birth weight. As well, approximately 50% of unintended pregnancies are terminated by abortion. There are already many existing national performance measures relating to various aspects of healthy pregnancies, including measures on infant mortality, low birth weight, very low birth weight, and prenatal care. This measure was selected because it is related to birth outcomes and reflects the overall health of pregnancies in the state. This measure continues SPM #6 from the last needs assessment cycle (2005-2010).

PERFORMANCE MEASURE:	Improve access and utilization of child dental services
STATUS:	Active
GOAL	To address the oral health needs of the MCH population through prevention, screening, referral, and appropriate treatment.
DEFINITION	<p>Percent of Medicaid children (ages 1-20) who received at least one preventive dental service in the last year.</p> <p>Numerator: Number of EPSDT children (ages 1-20) with at least one preventive dental service claim during calendar year</p> <p>Denominator: Number of EPSDT children (ages 1-20) during calendar year</p> <p>Units: 100 Text: Percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	<p>21-12</p> <p>Increase the proportion of low-income children and adolescents who received any preventive dental service during the past year to 57%.</p> <p>OH HP2020-4 continues HP2010 Objective 21-12.</p> <p>Healthy People 2020 Objective (Proposed)</p>
DATA SOURCES AND DATA ISSUES	This data will come from Illinois Department of Healthcare and Family Services (Medicaid) CMS 416 report (line 12B) on an annual basis. Data on dental services is provided to IDHFS through DentaQuest. This measure is a Healthcare Effectiveness Data & Information Set (HEDIS) measure.
SIGNIFICANCE	<p>This performance measure is linked to state priority #7. Dental cavities are a preventable disease, yet are the most common chronic disease among children. Children who have cavities at a young age are more likely to experience decay as they get older and children who have pain or tooth loss due to decay are at risk for learning, speech, and self-esteem problems. Low-income children have higher rates of dental decay throughout childhood and often have difficulty accessing dental providers. Regular preventive dental care is recommended once every six months throughout the lifespan to provide cleaning, early diagnosis and treatment, and education. The American Academy of Pediatrics (AAP), American Academy of Pediatric Dentistry (AAPD), and American Dental Association (ADA) recommend a child's first dental visit be at one year of age, or six months after the eruption of the first tooth. While there is an existing health system capacity indicator (#7B) on receipt of any dental services for EPDST-eligible children ages 6-9, we developed this new measure to specifically track preventive dental services. Because dental services are important throughout childhood and adolescence, this measure examines service utilization among all Medicaid children.</p>

PERFORMANCE MEASURE:	Maintain the distribution of mental health information and depression screening of pregant and postpartum women
STATUS:	Active
GOAL	To address the mental health needs of the MCH population through prevention, screening, referral, and appropriate treatment.
DEFINITION	<p>Percent of new moms reporting that a healthcare provider discussed depression with them during prenatal care</p> <p>Numerator: Weighted number of new mothers reporting a healthcare provider discussed depression with them during prenatal care</p> <p>Denominator: Weighted number of new mothers surveyed</p> <p>Units: 100 Text: Percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	<p>Not available</p> <p>MHMP HP2020-15: Increase depression screening by primary care providers Healthy People 2020 Objective (Proposed)</p>
DATA SOURCES AND DATA ISSUES	Pregnancy Risk Assessment Monitoring System (PRAMS) on an annual basis. PRAMS is a complex sample survey about maternal attitudes and behaviors before, during, and after pregnancy. It annually surveys ~1800 women roughly 3-6 months after delivery of a live infant. PRAMS is representative only of live births, not of all pregnancies or all women. Women who were not in prenatal care will be reclassified as answering "no" to this question because they were not reached by this intervention.
SIGNIFICANCE	This performance measure is linked to state priority #8. Postpartum depression (PPD) is a form of clinical depression that affects women after pregnancy, usually within a few months of giving birth. Common symptoms include sadness, fatigue, appetite changes, and anxiety. Various studies indicate that the prevalence of PPD is approximately 13-20% within the first year after delivery and may be even higher among teen mothers and those of low socioeconomic status. PPD can have negative effects on both the mother and new infant. Women who experience PPD are more likely to develop a chronic depressive disorder in the future. In addition, PPD can negatively impact mother-infant interaction, infant attachment, child development, and breastfeeding. On January 1, 2008, Illinois enacted the Perinatal Mental Health and Mood Disorders (PMHMD) Act, which mandates that healthcare providers offer depression screening during the prenatal and postnatal periods, as well as provide information about mental health disorders. This performance measure will track progress over time in one component of the PMHMD Act.

PERFORMANCE MEASURE:

Increase the percentage of youth participating in daily physical education at school

STATUS:

Active

GOAL

Increase the percentage of youth participating in daily physical education at school

DEFINITION

Percentage of adolescents who attended daily physical education class at school.

Numerator:

Weighted number of adolescents reporting attending physical education class daily at school

Denominator:

Weighted number of respondents to survey

Units: 100 **Text:** Percent**HEALTHY PEOPLE 2010 OBJECTIVE**

22-6; 22-7; 22-9

22-6: Increase the proportion of adolescents who engage in moderate physical activity for at least 30 minutes on 5 or more of the previous 7 days to at least 35%; 22-7: Increase the proportion of adolescents who engage in vigorous physical activity that promotes cardio-respiratory fitness 3 or more days per week for 20 or more minutes per occasion to at least 85%; 22-9: Increase the proportion of adolescents who participate in daily school physical education to at least 50%.

PAF HP2020-3: continues HP2010 Obj. 22-9.

Healthy People 2020 Objective (Proposed) PAF HP2020-7: Increase the proportion of adolescents that meet current physical activity guidelines for aerobic physical activity and for muscle-strengthening activity.

DATA SOURCES AND DATA ISSUES

Youth Risk Behavior Surveillance System (YRBS) during odd years. Prior to 2007, the response rate to the Illinois YRBS did not meet the minimum requirement for weighting of the data. So, for many years, YRBS in Illinois was not a reliable source of data. In 2007 and 2009, Illinois achieved the minimum required response rate and YRBS data is now weighted for the state. Illinois YRBS is conducted bi-annually by the Child Health Data Lab at Children's Memorial Hospital.

SIGNIFICANCE

This performance measure is linked to state priority #9: Promote healthy weight, physical activity & optimal nutrition for women and children. The goal of physical education in schools is to provide students with knowledge and enthusiasm to develop or maintain a healthy lifestyle into adulthood. Activities are designed to promote physical fitness, to instill knowledge & understanding of rules, concepts & strategies. Physical education learning standards are established in Illinois in: movement skills, physical fitness, team building, health promotion, human body systems & communication. In Illinois, all students in K-12th grade are required to participate in daily PE, however in certain situations, students may be exempt from PE or school districts may apply for a waiver from the PE mandate. Obese children are more likely than normal weight children to be overweight/obese adults. Physical activity can help adolescents achieve a healthy weight for their age, decreasing obesity & the correlated health risks (such as cardiovascular disease, sleep apnea, bone and joint problems, and social or psychological problems related to poor self-esteem). Research indicates that even moderate levels of regular physical activity can have cardio-respiratory benefits, especially among the unfit. Physical education in school is one means of encouraging adolescents to be active, maintain fitness, and establish healthy habits.

PERFORMANCE MEASURE:	Provide comprehensive transition planning for CSHCN ages 14 and above and their families
STATUS:	Active
GOAL	Provide comprehensive transition planning for CSHCN ages 14 and above and their families.
DEFINITION	<p>Proportion of CSHCN ages 14 and above and their parents who receive comprehensive transition planning services to promote awareness of adult services</p> <p>Numerator: Number of CSHCN ages 14 and above and parents who receive comprehensive transition planning with local care coordinators for the reporting year</p> <p>Denominator: Number of CSHCN ages 14-21 records reviewed</p> <p>Units: 100 Text: Percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	<p>Not available.</p> <p>Healthy People 2020 Objective (Proposed): AH HP2020-10a. Increase the percentage of adolescents with special health care needs who receive the health care services necessary to make transitions to adult life, including independence and adult health care.</p>
DATA SOURCES AND DATA ISSUES	Children's Health Management Information System, Special Report. In prior years, all DSCC records for youth were reviewed. For 2010 forward, only a sample of DSCC youth records will be reviewed. This performance measure is linked to state priority #10: Promote successful transition of youth with special health care needs to adult life.
SIGNIFICANCE	Effective transition of youth with special healthcare needs (YSHCN) to adult life is now a well-established priority for Title V programs. Families want to know how to obtain & pay for medical care when a child transitions to adult services as well as options for independent living, recreation and socialization. A comprehensive, coordinated effort is needed to assist families of CSHCN be better prepared for adult life. In a 2009 survey over 80% of DSCC families with a YSHCN reported having special planning needs for dental care & primary medical care & over 60% reported having special planning needs in continuing education, paying for healthcare, helping child manage own medical needs, adult specialty care & recreational activities. In 2009 62.3% of DSCC families with a YSHCN who needed a comprehensive transition plan reported already having or being in the process of developing one. This was an improvement from 2005 when only 50.7% of DSCC families reported having a comprehensive transition plan. While data from the National Survey of Children with Special Healthcare Needs (NS-CSHCN) addresses this, the DSCC program in Illinois does not serve all youth who meet the federal definition of special healthcare needs. As a result this measure was developed to track DSCC performance in providing transition services to youth in the program.
